## Optical Fibre Cable for Overhead Installation up to 80m Span Outdoor cable - Dielectric

From 2 to 288 fibres

### Applications

ACOPTIC® is the brand name for ACOME Groups optical fibre cable solutions for telecom networks. The UND ranges are ACOME's distribution solutions for FTTH networks. The UND1534 range is the **overhead** solution to link central office to any part of its FTTH network:

- FTTH (Node)
- FTTC
- FTTH/P/H (Building/Premises/ House)

Allows **up to 80m span** (in defined weather condition and installed with its dedicated anchoring and suspension clamps).

**Blowing and pulling into ducts is also appropriate** thanks to its mechanical features.

### Benefits

- **Dielectric and dry water blocking**
- Combines compactness, lightness and robustness
- Versatile: can be installed **overhead and into duct**
- **Compact-Tube® technology** for tool-free access to the fibre and easy storage of the module in Connectivity.
- **Easy cable preparation** with no risk of kinking on Compact-Tube® optical elements (end or mid-span).
- Additional ACOREX® rodent protection option available

### Standards

IEC/EN 60793 (fibre)  
IEC/EN 60794-3-20 (cable)

### Storage, packaging & installation

#### Cable protection

Cables are delivered with a covering for protection until they are required for installation.

#### Guideline access

Guidelines for storage, transportation & cable installation can be found in our [ACOPTIC guide](#).

### Design

- 1 **Compact-tube®:** 12 optical fibres (or 6 f) with an easy access strippable sheath
- 2 **Aramid yarn** (from 48f)
- 3 **Strength members:** 2 peripheral FRP
- 4 **Watertightness:** Dry water-blocking elements
- 5 **Outer sheath:** Black High Density Polyethylene (HDPE)

Example: 72f- 12 fibres per tube

### Compatibility aerial accessories :

Cables can be used with the following anchoring solutions :

- Wedge clamp
- Spiral dead-ends

Tests must be performed to ensure the cable/anchor couple is compatible.
